

SmartSpeaker™ for AlphaSmart®

A simple text-to-speech solution using the AlphaSmart®

- ◆ Portable, battery operated with self-contained amplified speaker

SmartSpeaker™ is an add-on speech output device for the AlphaSmart 2000/3000 and NEO. Based on the industry standard DECTalk speech synthesis, SmartSpeaker offers a simple and low-cost voice output solution. To speak, one simply types in messages to be spoken or select a phrase from commonly used phrases stored on the AlphaSmart.

This is one of the lowest cost DECTalk speech synthesizer solution on the market today. Ideal for use as a communication device for both children and adults.

Turn your AlphaSmart into a typing talker!
